Professional Summary

Final-year Computer Science (AI/ML) student with production experience building scalable backend services, cloud-native software, and real-time AI applications. Developed Spring Boot microservices serving 10,000+ concurrent requests at sub-200 ms latency and end-to-end speech-to-LLM systems with sub-500 ms latency. Strong in Python, C/C++, SQL, REST APIs, microservices, FastAPI, Spring Boot, and Docker.

Technical Skills

Languages: Python, C, C++, JavaScript, TypeScript, SQL
Software Engineering: Data Structures and Algorithms, REST APIs, Microservices, Scalable Backend Systems, Cloud-Native Architecture, Real-Time Systems, Object-Oriented Programming
Frameworks and Data: FastAPI, Spring Boot, Next.js, React, MongoDB, PostgreSQL, BigQuery, Docker
AI/ML: LLM Integration, LangChain, Google Gemini, Retrieval-Augmented Generation(RAG), Natural Language Processing (NLP), Speech-to-Text (STT), TensorFlow, PyTorch, Scikit-learn, LSTM, XGBoost
Tools: Git, Postman, Grafana, Jira, VS Code

Experience

GenAI Intern May 2026 – Present
Coforge *Noida, Uttar Pradesh*

- Delivered cloud-native Generative AI solutions for Fortune 500 clients, contributing to solution design, implementation, deployment, and production reliability.
- Engineered an end-to-end AI Interview Avatar platform integrating real-time speech processing, LLM inference, APIs, and conversational workflows; processed **250+ technical assessments**.
- Achieved **94% question-relevance accuracy** and **sub-500 ms** end-to-end speech-to-LLM-to-speech latency while reducing operational costs by **35%**.

Tech Lead - Deloitte Capstone Oct 2025 – Jan 2026
Deloitte *Remote*

- Built **FairLend**, a GenAI-powered fair-lending validation workbench using **FastAPI**, **Next.js**, **PostgreSQL**, and **Google Gemini** – cutting audit time from 4–6 weeks to **2–3 days per model run** across **3,100+ synthetic profiles** and 5 fairness dimensions.
- Partnered with a 4-member team and Deloitte mentors to align fairness KPIs with RBI-style governance standards, producing audit-grade evidence packs for banks and NBFCs.

Software Engineer Intern May 2025 – Jul 2025
Airtel *Gurugram, Haryana*

- Built a Voicebot Onboarding platform that reduced enterprise-customer integration time by **27%**.
- Developed and scaled backend microservices with Spring Boot, Next.js, and MongoDB, supporting **10,000+ concurrent requests** at **sub-200 ms** latency.
- Fine-tuned Speech-to-Text models for Indian languages, improving production transcription accuracy and enabling multilingual voice-AI workflows.

Projects

Cloud Computing Resource Optimizer | *Python, TensorFlow, BigQuery, Docker* Sep 2024 – May 2025

- Built and containerized a predictive autoscaling system that used **LSTM models** and real-time infrastructure metrics to forecast CPU and memory demand and prevent bottlenecks.
- Designed a cloud-native pipeline for capacity planning and resource allocation; demonstrated a simulated **20–35% infrastructure-cost reduction** while maintaining availability and reliability.

Education

Manipal University Jaipur Jaipur, Rajasthan
B.Tech. in Computer Science Engineering (Artificial Intelligence and Machine Learning) *2023 – 2027 (Expected)*

Certifications and Leadership

Certifications: Google AI Essentials; NPTEL Design and Analysis of Algorithms; NPTEL and CodeChef Data Structures and Algorithms (DSA).
Leadership: McKinsey & Company Forward Scholar; startup pre-incubation following two Ideathon wins; Perplexity Campus Partner, engaging 200+ students.
